

K-12 FIELD TRIP EXPERIENCES

All K-12 educational field trip experiences are designed by Taliesin Preservation's educational staff and adjusted to the age range of the students. Contact: Ola Shephard | groups@taliesinpreservation.org

TALIESIN EXPERIENCE (GRADES 6-12)

ONE-HOUR TOUR OF TALIESIN HOUSE AND GARDENS

This one-hour tour of the Taliesin residence with an optional additional activity is designed for grade 6-12 class field trips. Built in 1911, Taliesin was Wright's home for 50 years and the place where he would design his most masterful works. Experience the courtyards and gardens, Wright's drafting studio, and iconic Living Room. \$10 per person.

HILLSIDE EXPERIENCE (K-12)

ONE-HOUR TOUR OF THE HILLSIDE STUDIO AND THEATER

This one-hour Hillside Home School tour with an optional additional activity is designed for K-12 class field trips. A revolutionary design for Wright, Hillside was built on three levels to follow the hill's natural slope. Built in 1902 as a boarding school for his two aunts, it houses a theater and a 5,000 square foot drafting studio. \$5 per person.

HILLSIDE & TALIESIN (GRADES 6-12)

TWO-HOUR HILLSIDE AND TALIESIN COMBO TOUR

This combined experience allows students to get a more in-depth understanding of Wright's home estate and see two significant buildings - one an educational building and one his personal home - from different time periods of Wright's work and with different purposes. Weather dependent, this two-hour tour may include a 15-minute walk across the landscapes of Wright's property between his home and Hillside School. \$15 per person.

EDUCATIONAL OUTREACH

TALIESIN PRESERVATION

Taliesin Preservation engages students and educators alike in innovative cultural and educational programming at Taliesin, Frank Lloyd Wright's home and 800-acre homestead in the rural Driftless hills of Wisconsin on the outskirts of Spring Green.

In 2019, Taliesin was designated as part of a UNESCO World Heritage Site for its contribution to the 20th Century Architecture of Frank Lloyd Wright. Today, our educational programming strives to highlight Wright's principles of Organic Architecture as embedded at Taliesin.

Architectural education is invaluable for students of all ages and disciplines, as it allows students to understand their natural and built environments and teaches them how to sustain those environments.

IMMERSIVE DAY (K-12)

This immersive educational experience for K-12 classes will be customized to take advantage of the architectural, natural, or agricultural areas of the Taliesin estate. Groups may explore Wright's architecture and focus primarily on design; or groups may hike Taliesin's trails and focus on the native geology, prairies, and oak savannah; or groups may experience a day at the Taliesin farm. The estate is an inspirational setting for classes in which students sketch, paint, write or photograph. Note to optimize the student's experience during these full-day visits, we prefer group sizes between 20-30 people. \$25 per person.

Any of our student tour experiences described above can be expanded and customized to fit your group's interests and learning focus by adding a hands-on learning activity or nature hike through the pristine landscapes. In some cases, we can grant access passes to the estate for your own art activities such as painting, sketching, and photography (exterior access only for a specific time; no Taliesin Preservation instructor). To optimize the student's experience during these full-day visits, we prefer group sizes between 20-30. .
